# How to pair an EVO Pro remote to a TV

Step 1

From the home screen, go to Settings at the top right-hand corner.

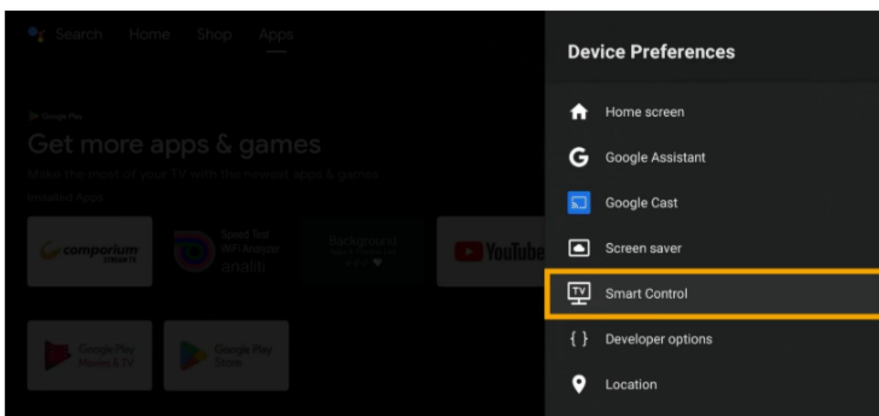

Step 2

Once in the settings menu, select the Device Preferences option.

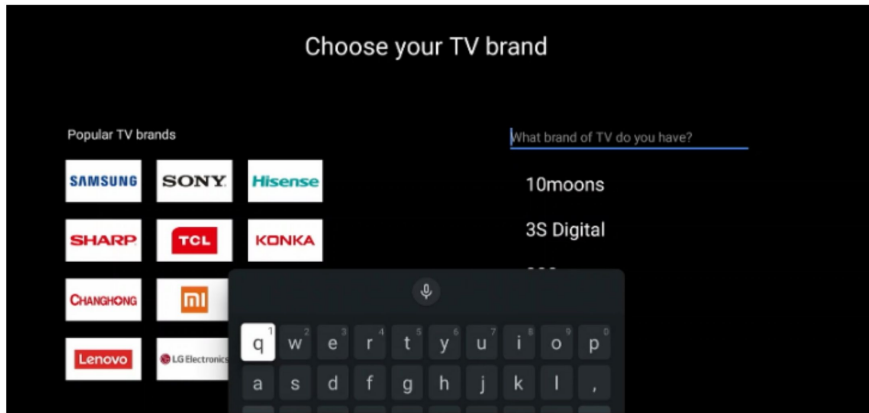

Step 3

Once in the Device Preference section, scroll down to Smart Control.
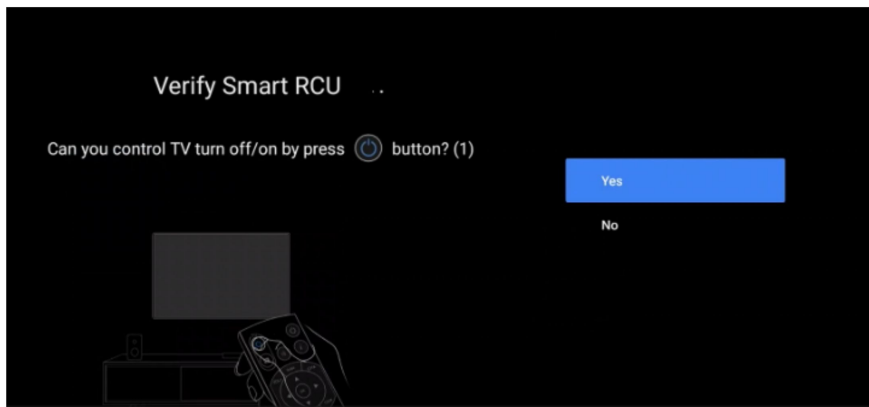

Step 4

From here, follow the instructions on the screen. Locate or type in your TV brand name.

Step 5

Then, follow the on-screen instructions. The Power button test is first.

Step 6

Next is the Input/Source button to check if the TV is capable of changing inputs and conduct a volume test.

Once complete, it will say the setup was successful.

Note: You can press the remote's **Home** button or **MYTV** button to exit the TV brand select screen.
If you are pairing an EVO Pro replacement remote, use the pairing steps below:
Pair EVO Pro remote (replacement)
- Press and hold the **Home** and **Back** buttons at the same time until the red light flashes quickly. Then, release the buttons.
- Wait a few seconds without pressing any buttons until you see a message indicating that the pairing was successful.
- Follow the steps above to pair the remote to your TV.

*If you are trying to connect a universal remote, refer to the remote manual to confirm compatibility with the EVO Pro.
